

Redmine - Patch #1058

reposman.rb patch to check if a project has the repository enabled before creating it!

2008-04-15 08:40 - Lionel Molinier

Status:	Closed	Start date:	2008-04-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
This simple patch adds a SOAP primitive to check if the project has the repository module enabled before creating it on the svn-server!			
It also enables the administrator to create automatically the well-known tags/branches/trunk folders.			

History

#1 - 2010-07-05 15:24 - Holger Just

- Status changed from New to Closed

The SOAP API is not present in Redmine anymore. Also, reposman checks if the repository module enabled and unconfigured. This patch is thus obsolete.
