Description

In my company I had a request to found a plugin for redmine in order to solve a problem like this one :
http://www.redmine.org/boards/2/topics/3824 (assign a few members (from a group) automatically to projects when they are created)
For this purpose I created a plugin in order add default members from a default group with default roles(specified in plugin settings)

please add to plugin list

#3 - 2012-04-14 23:37 - Jean-Philippe Lang

I think you don't need this hook in the controller since you do not use any parameters. You could just add a standard after_create callback on the Project model to automatically add some members.

+1
thought about doing this with the rest api but this would be great as a integrated feature

#5 - 2012-04-17 18:56 - Sajin Andrei

- Status changed from New to Resolved

#6 - 2012-04-17 18:59 - Sajin Andrei

Done http://www.redmine.org/plugins/default_members

Closing this as the plugin seems to answer the problem. Fyi #5605 was mentionning a similar feature (inherit members in sub-projects) and has been integratedin Redmine 2.3.x.
