<b>Description</b> When changing the subject of a ticket the notification E-Mail contains e.g. this:  Subject changed from Create a Phase 3 Software Prototype for the Review to Create a Phase 3 Software Prototype  It would be much more readable if the different subjects would be quoted like this:  Subject changed from "Create a Phase 3 Software Prototype for the Review" to "Create a Phase 3 Software Prototype"  Or even restructured e.g. like this:  Subject changed from "Create a Phase 3 Software Prototype for the Review" to "Create a Phase 3 Software Prototype"

It would be even better if i have variables for this text string which i can use in any email template which can be configured in admin section.  
E.g

```
Hello ${username},  
  
the subject has changed from ${oldSubject} to ${newSubject} .
