#### Associated revisions

##### Revision 9442 - 2012-04-19 09:17 - Jean-Philippe Lang

Fixed that "Create and continue" buttons are broken by r9391 (#10675).

#### History

##### #1 - 2012-04-16 11:30 - Etienne Massip

- Affected version (unused) set to 1.4.0

- Affected version set to 1.4.0

##### #2 - 2012-04-16 12:11 - Etienne Massip

Reproduced with FF & Chrome, works fine on [www.redmine.org](http://www.redmine.org) but not on <http://xxx.m.redmine.org>.

According to my log, worked fine on [r9381](#).

Since then, looks like submit control name is no more in POST form data.

##### #3 - 2012-04-16 22:24 - Etienne Massip

Guess it's due to [r9391](#) for [#6555](#) wich disables input[type=submit].

##### #4 - 2012-04-17 09:35 - Etienne Massip

Following replacement might be overkill but works on Chrome & IE8:

```
function addFormObserversForDoubleSubmit() {
  $$('form[method=post]').each(function(form) {
    form.on('submit', function(form_submission) {
      alreadySubmitted = (form.getStorage().get('submitting') == true);
      if(alreadySubmitted)
        form_submission.stop();
      else
        form.getStorage().set('submitting', true);
    });
  });
}
```

##### #5 - 2012-04-17 09:41 - Etienne Massip

Shorter, not tested:

```
function addFormObserversForDoubleSubmit() {
  $$('form[method=post]').each(function(form) {
    form.on('submit', function(form_submission) {
      if(form.getStorage().get('submitted'))
        form_submission.stop();
      else
```

```
    form.getStorage().set('submitted', true);
  });
});
}
```

#### #6 - 2012-04-18 07:48 - Jean-Philippe Lang

- Target version changed from Candidate for next minor release to 1.4.1

#### #7 - 2012-04-18 08:52 - Etienne Massip

Note: of course the above code will break any form in the application which should be allowed to be submitted more than once.

#### #8 - 2012-04-18 13:51 - Jean-Philippe Lang

The shorter patch works fine for with FF11, latest Chrome and IE6/9 as well. Please commit.

So did [r9391](#). We can add a special class on forms that need to be submitted more than once.

Are there such forms? I was thinking of some Rails dark magic reloading only a part of the form DOM via XHR on form submission, but I don't know if it exists?

#### #10 - 2012-04-18 19:39 - Jean-Philippe Lang

I don't think there is any of these forms in the core but it might be desirable, just in case a plugin needs it. Something like:

```
function addFormObserversForDoubleSubmit() {
  $$('form[method=post]').each(function(form) {
    if (!form.hasClassName('multiple-submit')) {
      form.on('submit', function(form_submission) {
        if(form.getStorage().get('submitted'))
          form_submission.stop();
        else
          form.getStorage().set('submitted', true);
      });
    }
  });
}
```

#### #11 - 2012-04-18 19:59 - Etienne Massip

Think you've got the best answer.

#### #12 - 2012-04-19 09:19 - Jean-Philippe Lang

- Status changed from Confirmed to Closed

- Resolution set to Fixed

Fix committed, thanks.
