The gitoSis plugin version is the same - before upgrade and after.

Why you think that problem is there? When on Redmine 1.1.3.stable it works fine.

#3 - 2012-04-16 16:05 - Toshi MARUYAMA

It seems this plug-in does not support [#779](#).

#4 - 2012-04-16 16:13 - Eugene Elementoff

But there is only one Repository for that project.

All other projects with git repos worked fine.

#5 - 2012-04-16 16:19 - Toshi MARUYAMA

[#779](#) refactored many implementing.
