

Redmine - Defect #10706

Redmine Upgrade wiki page should include details about mysql gem change

2012-04-19 05:17 - David JB

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description			
<p>Upgrading from Redmine 1.3 to 1.4 I have found that the specification of 'mysql' as the database adapter needs to change to 'mysql2'.</p> <p>Can this be added to the wiki page @ http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade ?</p> <p>The following error message is what happens (useful to add to doco as well):</p> <pre>1. rake db:migrate RAILS_ENV=production !!! The bundled mysql.rb driver has been removed from Rails 2.2. Please install the mysql gem and try again: gem install mysql. rake aborted! cannot load such file -- mysql</pre>
