Target version:			
Resolution:	Invalid	**Affected version:**	1.4.1

Description

I try to migrate from Redmine 1.1.2 to 1.4.1
When i run "rake generate_session_store" i got this error:

```
rake generate_session_store
(in /home/redmine/redmine-1.4.1)
Please install RDoc 2.4.2+ to generate documentation.
```

So i install newer version of rdoc:

```
gem install rdoc
Fetching: rdoc-3.12.gem (100%)
Depending on your version of ruby, you may need to install ruby rdoc/ri data:

<= 1.8.6 : unsupported
 = 1.8.7 : gem install rdoc-data; rdoc-data --install
 = 1.9.1 : gem install rdoc-data; rdoc-data --install
>= 1.9.2 : nothing to do! Yay!
Successfully installed rdoc-3.12
```

but when i run "rake generate_session_store" still get this error again.

Solved by adding:

```
gem "rdoc", ">=2.4.2"
```

to Gemfile

History

#1 - 2012-04-24 20:52 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

This is not an error. This message is displayed by Rails when loading its default tasks.
The rdoc gem is not required for rake generate_session_store to work properly.
