Target version:		Affected version:	
Resolution:			

Description

If the name for a custom field is very long, then will the name overlap the value in the pdf export.

I truncated the custom_value.name to twenty characters in my installation:

lib/redmine/export/pdf.rb:359

```
pdf.RDMCell(35,5, truncate(custom_value.custom_field.name, :length=>20) + ":", "L")
```
