

Redmine - Defect #10760

Time logging via commit message - does not work

2012-04-24 21:24 - Ivan Cenov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Time tracking	Estimated time:	0.00 hour
Target version:		Affected version:	1.4.1
Resolution:	Invalid		
Description			
Redmine trunk r9523 Ruby 1.8.7 Rails 2.3.14 "Enable time logging" = on			
It seems that time logging via commit messages does not work (at least in my test installation).			
I tried with			
<pre>RTC #31 @1h10</pre>			
and			
<pre>RT #31 @1h15</pre>			
<pre>Trying to log via commit message</pre>			
(RT and RTC are my trigger keywords that are configured in Settings.Repositories.)			
These commit messages appear "Associated revisions" in the issue (in my case #31), so it is clear that relations between the issue and the revisions had been created. No time log records are added though.			
Time log created interactively in Redmine are recorded.

#2 - 2012-04-24 21:34 - Ivan Cenov

P.P.S.

Here is the log when accessing the repository to fetch the changesets.

```
Processing RepositoriesController#show (for 192.168.2.100 at 2012-04-24 22:32:09) [GET]
  Parameters: {"action"=>"show", "id"=>"first", "controller"=>"repositories"}
TimeEntry could not be created by changeset 30: User can't be blankActivity can't be blank
Rendering template within layouts/base
Rendering repositories/show
Completed in 1922ms (View: 609, DB: 47) | 200 OK [http://walker/projects/first/repository]
```

TimeEntry could not be created by changeset 30: **User can't be blank Activity can't be blank**

#3 - 2012-04-25 18:41 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

- User can't be blank

The committer is unknown because you're not using the same usernames in your scm and in Redmine. You have to do the mapping in Project settings -> Repositories -> [Your repository] -> Users.

- Activity can't be blank

You have to set a default time tracking activity (Administration -> Enumerations) or choose one that will be used when logging time via commit messages (Administrations -> Settings -> Repositories).

Hope this helps.
