

Redmine - Defect #10856

can not load translations from hr.yml with ruby1.9.3-p194

2012-05-09 00:24 - Hannu Hohenthal

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Ruby support	Estimated time:	0.00 hour
Target version:	1.4.2	Affected version:	1.4.1
Resolution:	Fixed		
Description			
<p>I'm setting up a Redmine 1.4.1 installation on a windows environment and when doing a "rake db:migrate" I started getting a lot of errors regarding files in config/locales like:</p> <p>rake aborted! can not load translations from F:/webserver/redmine-1.4.1/config/locales/hr.yml, expected it to return a hash, but does not</p> <p>I re-downloaded the .zip file from http://rubyforge.org/frs/?group_id=1850 and checked the MD5sum which was correct but the problem persisted. I then proceeded to download the .tar.gz file, unpacked it, copied all the locales and after that "rake db:migrate" worked without a problem. I use 7zip 9.20 64bit to unpack on Windows 7 Professional 64bit.</p>			

History

#1 - 2012-05-10 19:08 - Jean-Philippe Lang

Are you using latest ruby 1.9.3 (p194)?

#2 - 2012-05-10 22:30 - Hannu Hohenthal

Yes I was. I just found it very strange that the files in the .tar.gz would work and the files in the .zip wouldn't.

#3 - 2012-05-11 00:24 - Jean-Philippe Lang

- Subject changed from redmine-1.4.1.zip file contains corrupt files to can not load translations from hr.yml with ruby1.9.3-p194
- Category set to Ruby support
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 1.4.2
- Resolution set to Fixed

The files are not corrupted in the zip file but they just can't be parsed with ruby1.9.3-p194. This problem does not occur with previous ruby versions (eg. 1.9.3-p125).

It was fixed in r9593.
