Description

I'm using Redmine 1.4.1 (fresh update from the 1.4-stable SVN branch)

PDF export works in issues, etc. except for in wiki pages. Whe clicking on PDF, Apache gives an "Internal Error", and Webrick gives me the following error message:

```
NoMethodError in WikiController#show

Never mind, fixed it. I migrated from ChiliProject back to Redmine and had to undo some changes it had done to my DB.

For posterity:
I created a pristine redime datanbase as in given by the installation instructions and compared it to mine. I had to rename the field version and add the field comments.
