Description

Yesterday I upgraded from 1.3.X on my gentoo machine to 1.4.1. Everything works except for one thing, as soon as I want to open the settings of a project I get an 500 internal error. Webrick gives me the following output:

```
Processing ProjectsController#settings (for 89.206.103.147 at 2012-05-10 11:37:57) [GET]
  Parameters: {"action"=>"settings", "id"=>"policelight-ringtoni", "controller"=>"projects"}

Since it seemed similar to [#10827](#) I applied that patch there, but with no success...
