Target version: 1.4.2

Resolution: Fixed

# **Description**

In #2879 you added a header called 'List-Id' to help solve your vacation responder problems.

In #2984 however this change was revoked because it didn't solve the problem with Outlook.

However, I'd like to see the List-Id header brought back, as it gets treated like a first class filter type in Gmail filtering and would greatly help my workflow. I can see that the original problem was around bulk-handling and vacation responders, but this request isn't aimed at that at all.

I would presume the solution would be to bring back the original code in app/models/mailer.rb:

'List-Id' => "<#{Setting.mail\_from.to\_s.gsub('@', '.')}>"

As show in this revision:

<a href="http://www.redmine.org/projects/redmine/repository/revisions/2565/diff/trunk/app/models/mailer.rb">http://www.redmine.org/projects/redmine/repository/revisions/2565/diff/trunk/app/models/mailer.rb</a>

## Revision 9687 - 2012-05-13 12:44 - Jean-Philippe Lang

Restored List-Id header in email notifications (#10888).

### **History**

### #1 - 2012-05-13 12:47 - Jean-Philippe Lang

- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 1.4.2
- Resolution set to Fixed

Header added back in 1.4.2.

# #2 - 2013-03-06 18:59 - Jimmy Engelbrecht

Suggested improvement #13359
