Target version:			
Resolution:		**Affected version:**	

Description

View options defined for Gantt chart view (number of months, starting month, zoom factor) are not saved.
Browsing off from Gantt chart view and returning back causes Gantt chart view options be reset.

History

#1 - 2007-10-11 17:00 - Jean-Philippe Lang

It's not a bug (just like when you browse off from any pagination,
you get page #1 when you return back).
But I made a small impprovement: months count and zoom factor
are automatically saved as user preferences.
