Target version: 2.1.0  Resolution: Fixed

Description

I want to create a tracker with all the custom fields. I don't want any default fields to be displayed in it.

Mischa, how about changing or adding to the title of this feature so that it describes the ones it duplicates also, more accurately..? I'm thinking a solution to this is more general than disabling the default ticket fields?

#5 - 2010-01-04 09:37 - Jan Ivar Beddari

Sorry, I see now that this is related to #703 and together these are enough. Feel free to remove/delete these non-productive comments :)

I need to have a new issues interface that can be used by external parties. I don't want them to be able to see the "Assigned to" or "Due date" etc fields.

I am running 1.0.5 and I made the following changes to redmine/app/views/issues/_form.rhtml

```
---
24,26c24,28
<
= render :partial => 'issues/attributes'
```

2020-04-11
This will render the issue attributes IF AND ONLY IF the user is a "Reporter" role. This will also remove access to any custom fields. It is a quick and VERY dirty hack but it is enough to keep me going until this issue is solved.

This capability would be huge.

#13 - 2011-04-26 15:39 - Terence Mill

I opened a feature request a time ago, which will include all this kind of field configuration.

See here Issue #8050

+1 Yes, indeed!

No reason not to include this feature. Arranging the form to your liking would also be quite useful. Right now, I added 4 extra fields and my eyes are already jumping around the form looking for the ones I need to fill in and for those I want to skip.

Feature added in r9912. You can now disable regular fields on the tracker form:

standard_fields.png

That's required in issue #8417

No reason not to include this feature. Arranging the form to your liking would also be quite useful. Right now, I added 4 extra fields and my eyes are already jumping around the form looking for the ones I need to fill in and for those I want to skip.

Sure not.

Why do I still can't disable the "Status/Priority/File attaching/Watchers" field? People wanna add a complete new issue tracker things like meeting/billing.sales...

Badly need to need this feature!

Well, this could be solved after this patch is applied to the core #12005.

Best regards,
Daniel

But the "priority" field still seems permanent. Is there a way to include that in the list of default fields that can be disabled? I have a specific tracker that doesn't need this field and it's causing some mild confusion with issue reporters.

Ashish Agrawal

Is there a plugin to disable the Issue core fields such as assigned_to_id on a project level basis? As per the existing settings, only custom fields can be disabled on a per project basis. Standard fields can be disabled per tracker/role/user but not per project.

I want standard fields disable options same as custom fields in project settings also.
