Redmine - Feature #1091
Disabling default ticket fields per tracker
2008-04-23 05:53 - girish konnur

Status: Closed
Priority: Normal
Assignee: Jean-Philippe Lang
Category: Issues
Target version: 2.1.0
Resolution: Fixed

Description

I want to create a tracker with all the custom fields. I don't want any default fields to be displayed in it

Revision 9912 - 2012-07-05 14:20 - Jean-Philippe Lang

Ability to disable standard fields on a per tracker basis (#1091).

Revision 9914 - 2012-07-05 14:52 - Toshi MARUYAMA

generate translation files (#1091)

History

#1 - 2008-04-26 14:21 - Jean-Philippe Lang
- Subject changed from How to create a tracker with all custom fields to Disabling default ticket fields
- Category changed from Custom fields to Issues
- Target version deleted (0.7)

Default fields can not be disabled for now.

#2 - 2009-12-26 16:29 - Kamil

Default fields can not be disabled for now
Are you going to provide the solution in the future?

#3 - 2009-12-29 00:36 - Mischa The Evil

Fixed the issue-relationships...

#4 - 2010-01-04 09:34 - Jan Ivar Beddari

Fixed the issue-relationships...

Mischa, how about changing or adding to the title of this feature so that it describes the ones it duplicates also, more accurately...? I'm thinking a solution to this is more general than disabling the default ticket fields?

#5 - 2010-01-04 09:37 - Jan Ivar Beddari

Sorry, I see now that this is related to #703 and together these are enough. Feel free to remove/delete these non-productive comments :)

I need to have a new issues interface that can be used by external parties. I don't want them to be able to see the "Assigned to" or "Due date" etc fields.

I am running 1.0.5 and I made the following changes to redmine/app/views/issues/_form.rhtml

```
24,26c24,28
---
>
<div id="attributes" class="attributes">
= render :partial => 'issues/attributes'
```
This will render the issue attributes IF AND ONLY IF the user is a "Reporter" role. This will also remove access to any custom fields. It is a quick and VERY dirty hack but it is enough to keep me going until this issue is solved.

This capability would be huge.

#13 - 2011-04-26 15:39 - Terence Mill

I opened a feature request a time ago, which will include all this kind of field configuration.

See here Issue #8050

+1 !!!!!!!!!!!!
+1 Yes, indeed!

No reason not to include this feature. Arranging the form to your liking would also be quite useful. Right now, I added 4 extra fields and my eyes are already jumping around the form looking for the the ones I need to fill in and for those I want to skip.

Feature added in r9912. You can now disable regular fields on the tracker form:

standard_fields.png

That's required in issue #8417

+1 Yes, indeed!

No reason not to include this feature. Arranging the form to your liking would also be quite useful. Right now, I added 4 extra fields and my eyes are already jumping around the form looking for the the ones I need to fill in and for those I want to skip.

IS this feature also will be enabled on the 1.4 world?

Sure not.

Why do I still can't disable the "Status/Priority/File attaching/Watchers" field? People wanna add a complete new issue tracker things like meeting/billing/sales...

Badly need to need this feature!

Badly need to need this feature!

Well, this could be solved after this patch is applied to the core #12005.

Best regards,
Daniel

#35 - 2013-08-01 00:19 - Mischa The Evil
- Precedes Defect #14584: Standard fields disabled for certain trackers still appear in email notifications added

#36 - 2013-12-04 05:37 - Toshi MARUYAMA
- Related to Defect #12707: Typo in app/models/tracker.rb added

#37 - 2014-10-04 17:56 - Damon Tabb

But the "priority" field still seems permanent. Is there a way to include that in the list of default fields that can be disabled? I have a specific tracker that doesn't need this field and it's causing some mild confusion with issue reporters.

#38 - 2015-03-06 04:42 - Go MAEDA
- Related to Feature #6637: "unwanted" features as plugins added

Is there a plugin to disable the Issue core fields such as assigned_to_id on a project level basis? As per the existing settings, only custom fields can be disabled on a per project basis. Standard fields can be disabled per tracker/role/user but not per project.

I want standard fields disable options same as custom fields in project settings also.
