Redmine - Feature #10926

Version custom field should display the project name in the combo box

Description

We have a large platform project with many sub-projects and it's important to declare the version dependencies between the sub-projects.

For sure we have this information in our projects' build descriptions, but having it in the roadmaps makes it clear what a project depends on.

Unfortunately, selecting the right versions from the custom field combo box is not usable enough since the sub-project name is not prepended to the version name.

Example **v1.0** to be **Inventory - v1.0**, just like in the **Target version** issue filter.

History

#1 - 2012-05-15 15:46 - Etienne Massip

- Target version set to Candidate for next minor release

#2 - 2012-05-15 15:46 - Etienne Massip

- Tracker changed from Defect to Feature

#3 - 2012-05-15 16:38 - Maher Gamal

I would like to add that it would be great to have the value appearing on the roadmap page link to the version's page.

Ex. **Inventory v1.0** links to http://www.example.com/versions/3213

#4 - 2012-05-15 17:53 - Mischa The Evil

- Resolution set to Duplicate

The issue as reported in the initial description (so excluding the roadmap 'thingy' as described in #note-3) is exactly the thing I've reported in issue #9850, which itself is also related to #9851.

#5 - 2013-02-15 23:10 - Mischa The Evil

- Status changed from New to Closed

- Target version deleted (Candidate for next minor release)

Actually, the project name **is** already prepended to shared versions displayed on the Roadmap view with or without using the Subprojects selection in the right side-bar. This also applies to both the *project- and global* Gantt views but specifically **not** for:

- the *project* Calendar view (since shared versions aren't displayed there anyways);
- the Version view (since versions are always tied to a single project anyway);
- the *project- and global* Issue list view columns and finally, I think,
- the Redmine version links.

I suggest to move this topic to #9850. I'll start by updating it with the found information (based on Redmine 2.1.x / *.m.redmine.org) in #9850-9 [note-9].

The initial request to display the project name prepended to a version in the Version custom field combo box is duplicating #9850 completely as said earlier; hence closing this issue as such.
