Resolution:	Invalid		**Affected version:**	

Description

Good day!

I'm using Redmine 1.3.2.stable (MySQL) with git and I've just tried to file an issue in one project with reference to git commit from another project.

I typed it a project-id:<8 symbols from commit id> (yes, there is a dash in the project id, but projects without a dash sign in the name doesn't work either)
but this text was left intact, i.e. no url was generated.

I tried to reopen #7409, but no dice, so i had to create new one.

History

Did you check the Allow issues of all the other projects to be referenced and fixed checkbox in the Administration/Settings/Repositories tab?

Etienne,
i'm not sure what checkbox are you referencing to, but i've attached two web-shots of my settings pages.

#3 - 2012-05-21 15:48 - Etienne Massip

Sorry, this is a 1.4.0 feature, see #3087.

#4 - 2012-05-21 16:04 - Andrey L

oh, i see. i was mislead by target version (1.2.0) of #7409.
thank you for the comments!

#5 - 2012-05-21 16:33 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

No problem.
