

Redmine - Defect #11045

automatic user creation via "redmine:email:receive .. unknown_user=create" ignores ldap realm/server user base

2012-05-29 17:12 - Terence Mill

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.3
Resolution:	Duplicate		
Description			
<p>If using ldap as user realm user can login first time and redmine creates internal new user (auto register) linked to ldap realm if user can authenticate against ldap successfully.</p> <p>If i use "redmine:email:receive .. unknown_user=create" and email sender is an email from user from my ldap realm which never logged in into redmine via web from this is ignored and i get a user linked to the internal user realm</p> <p>Expectation is that redmine uses ldap query to check if sender email exists in ldap database and if yes the ldap realm is used and user data is synced from there (auto register) as done regularly at form based login first time.</p> <p>Could be a switch too.</p>

Same as [#10920](#)?

#2 - 2012-05-29 20:12 - Terence Mill

Uhm, you're right. I was on holidays and forgot I already reported. I am well recovered, you see.
