

Redmine - Defect #11056

text color syntax not working

2012-05-30 16:40 - Amrish Bharatiya

Status:	Closed	Start date:											
Priority:	Normal	Due date:	2013-03-24										
Assignee:		% Done:	0%										
Category:	Wiki	Estimated time:	0.00 hour										
Target version:		Affected version:	2.0.0										
Resolution:	Invalid												
Description													
<p>I am not able to apply text color styles to my wiki pages as shown below:</p> <p> I did search around for this problem and thought that setting self.filter_styles=false in formatter.rb would resolve it, as you can see from the image below, I have it set with no luck!</p> <p> code.PNG</p> <p>I am using bitnami virtual appliance with following version of application stack:</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.0.0.stable</td></tr><tr><td>Ruby version</td><td>1.8.7 (x86_64-linux)</td></tr><tr><td>Rails version</td><td>3.2.3</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>MySQL</td></tr></table> <p>Redmine plugins:</p> <p>no plugin installed</p> <p>Is there anything else I am missing?</p> <p>Thanks for your help!</p>				Redmine version	2.0.0.stable	Ruby version	1.8.7 (x86_64-linux)	Rails version	3.2.3	Environment	production	Database adapter	MySQL
Redmine version	2.0.0.stable												
Ruby version	1.8.7 (x86_64-linux)												
Rails version	3.2.3												
Environment	production												
Database adapter	MySQL												

History

#1 - 2012-05-30 19:52 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

With Redmine >= 1.4.0:

`p{color:red}. this is red`

displays:

this is red

#2 - 2012-06-02 01:26 - Amrish Bharatiya

Thanks for the quick response.

I was wondering if there is anything planned to allow formatting part of text withing a paragraph.

#3 - 2012-07-18 14:04 - Keats .

- Status changed from Closed to Reopened

it's not working with 2.0.3 at least

#4 - 2013-03-17 13:36 - Dipan Mehta

This actually works but with a peculiar behavior

some text

p{color:red}. this is red

produces

some text
p{color:red}. this is red

(not red). But

some text

p{color:red}. this is red

produces

some text

this is red

I don't know if this is expected behavior or I am missing something!

Dipan.

#5 - 2013-03-17 16:41 - Daniel Felix

- Due date set to 2013-03-24

- Status changed from Reopened to Needs feedback

Well this is a problem which applies on many wiki syntaxes.

The same with the code, ordered or unordered list or even with headings.

This is more likely a general textile problem.

Please give done feedback until next week. Otherwise this issue will be closed.

#6 - 2013-03-18 08:56 - Etienne Massip

- Status changed from Needs feedback to Closed

You need to put some space before the "p. ".

Every lonely line is a paragraph in Textile, if it is not a lonely line then it can't be a paragraph; using the "p. " simply allow you to adjust the paragraph style or set language (see <http://redcloth.org/hobix.com/textile>).

#7 - 2013-03-18 09:21 - Dipan Mehta

Understood!

But trust me - had this issue not been filed, I would have never come across that thing such as 'color' is even possible! The documentation is clearly lacking this and many similar things that I don't even know yet!

Dipan.

As briefly described in [online help](#), Redmine rely on Textile for text formatting; there are probably a lot of Textile formatting possibilities you (and I) don't even know they exist you might be interested in.
