Description

There is any possibility to insert HTML fragments in wiki/project description?

I was looking for similar functionality and so I added a simple macro to macros.rb.
Here is the code snippet.

```
desc "Insert html" + "\n\n" +
     "  !{{html(html block)}}"
macro :html do |obj, args|
   return CGI::unescapeHTML(args.join(","))
end
```

Can you add this in a next release of Redmine ?

History

- Tracker changed from Defect to Feature

- Category set to Text formatting

#2 - 2012-05-30 20:17 - Etienne Massip

Not very safe for instances allowing wiki page editing to everybody.

It's true, but this feature allow you to add more informations to your wiki/issue.
To control this feature, for example, you can add a new permission to group, no?
