Redmine - Patch #11064

Trac -> Redmine wiki conversion : slashed links

2012-05-31 11:43 - Adrian Wilkins

Description

Trac permits slashes in wiki page names. Redmine does not (if you use them, it just ignores them).

This patches the regex in the rakefile to accept slashes as part of a wiki name. Redmine then just goes on ignoring them and everything works.
