

Redmine - Defect #11071

Redmine does not install and run on Fedora 17

2012-06-01 14:26 - Steve Short

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	2.0.1
Resolution:	Invalid		
Description			
Failure occurs during 'rake generate_secret_token;. Output with trace options is here:			
rake aborted! undefined method `active_record' for #<Rails::Application::Configuration:0x9f8bb9c> /usr/local/share/gems/gems/railties-3.2.3/lib/rails/railtie/configuration.rb:85:in `method_missing' /var/www/redmine/config/application.rb:26:in ` <class:application>' /var/www/redmine/config/application.rb:13:in `<module:redmineapp>' /var/www/redmine/config/application.rb:12:in `<top (required)="">' /usr/share/rubygems/rubygems/custom_require.rb:36:in `require' /usr/share/rubygems/rubygems/custom_require.rb:36:in `require' /var/www/redmine/Rakefile:5:in `<top (required)="">' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/rake_module.rb:25:in `load' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/rake_module.rb:25:in `load_rakefile' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:501:in `raw_load_rakefile' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:82:in `block in load_rakefile' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:133:in `standard_exception_handling' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:81:in `load_rakefile' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:65:in `block in run' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:133:in `standard_exception_handling' /usr/local/share/gems/gems/rake-0.9.2.2/lib/rake/application.rb:63:in `run' /usr/local/share/gems/gems/rake-0.9.2.2/bin/rake:33:in `<top (required)="">' /usr/local/bin/rake:23:in `load' /usr/local/bin/rake:23:in `<main>'</main></top></top></top></module:redmineapp></class:application>			
Fresh install of fedora 17. Fresh install of ruby and ruby gems. Followed instructions at http://www.redmine.org/projects/redmine/wiki/RedmineInstall .			
Running RAILS_ENV=production rake about fails with the same error.

History

#1 - 2012-06-07 21:05 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

According to https://bugzilla.redhat.com/show_bug.cgi?id=829209.

#2 - 2012-06-08 07:04 - Igor Siap

- Status changed from Closed to Reopened

It does not help.

Fedora 17, Redmine 2.0-stable

```
rpm -q ruby  
ruby-1.9.3.194-11.fc17.i686
```

```
bundle show
```

```
Gems included by the bundle:
```

```
* actionmailer (3.2.5)  
* actionpack (3.2.5)  
* activemodel (3.2.5)  
* activerecord (3.2.5)  
* activeresource (3.2.5)  
* activesupport (3.2.5)  
* arel (3.0.2)  
* bigdecimal (1.1.0)  
* builder (3.0.0)  
* bundler (1.1.4)  
* coderay (1.0.6)  
* erubis (2.7.0)  
* hike (1.2.1)  
* i18n (0.6.0)  
* journey (1.0.3)  
* json (1.7.3)  
* mail (2.4.4)
```

```
* mime-types (1.18)
* minitest (3.0.1)
* multi_json (1.3.6)
* mysql2 (0.3.11)
* net-ldap (0.3.1)
* polyglot (0.3.3)
* prototype-rails (3.2.1)
* rack (1.4.1)
* rack-cache (1.2)
* rack-openid (1.3.1)
* rack-ssl (1.3.2)
* rack-test (0.6.1)
* rails (3.2.5)
* railties (3.2.5)
* rake (0.9.2.2)
* rdoc (3.12)
* ruby-openid (2.1.8)
* sprockets (2.1.3)
* thor (0.15.2)
* tilt (1.3.3)
* treetop (1.4.10)
* tzinfo (0.3.33)
```

but anyway the error still exists

```
rake generate_secret_token --trace
```

```
rake aborted!
```

```

```

#3 - 2012-06-12 08:23 - Bohuslav Kabrda

This bug has been fixed on Fedora side. Update using

```
"sudo yum update ruby rubygem-bigdecimal --enablerepo=updates-testing"
```

There is however another similar issue, that I believe should be solved on the Redmine's side: <http://www.redmine.org/issues/11141> (When this is fixed, everything works properly.)

#4 - 2012-06-12 09:40 - Igor Siap

Thanks, but next bug is

```
RAILS_ENV=production rake db:migrate
rake aborted!
```

```
Please install the mysql2 adapter: `gem install activerecord-mysql2-adapter` (cannot load such file -- mysql2
/mysql2)
```

```
Tasks: TOP => db:migrate => environment
(See full trace by running task with --trace)
```

but when I add symlink

```
In -s /usr/local/share/gems/gems/mysql2-0.3.11/lib /usr/share/ruby/mysql2
then:
```

```
RAILS_ENV=production rake db:migrate
```

```
rake aborted!  
uninitialized constant Mysql2::Client::REMEMBER_OPTIONS
```

```
Tasks: TOP => db:migrate => environment  
(See full trace by running task with --trace)
```

```
rpm -qa|grep mysql  
mysql-libs-5.5.23-1.fc17.i686

* thor (0.15.2)  
* tilt (1.3.3)  
* treetop (1.4.10)  
* tzinfo (0.3.33)
```

How it can be fixed?

#5 - 2012-06-14 12:33 - Bohuslav Kabrda

Please see https://bugzilla.redhat.com/show_bug.cgi?id=829209#c23 and the following comment for the solution. Let me know in the bugzilla, whether it solves the problem for you (and we can close the issue here, too).

#6 - 2012-06-15 07:49 - Igor Siap

Thanks a lot. Full Reinstall helps me.

#7 - 2012-07-01 21:32 - Charlie Mordant

Plugin system doesn't work with f17:

When I execute rake db:migrate it fall with an unknown method error (after correcting the gemFile, adding dependencies gem to the file). O will post the trace soon...

Regards

#8 - 2015-12-11 13:54 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Too old.
