

Redmine - Patch #11083

fix edit view for repositories

2012-06-03 07:02 - Oz Mose

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:			
Description			
It's kindof limited to edit repositories as we can't change the path from there, but I tried and it failed. I attach the tiny patch that fixed the display.			

History

#1 - 2012-06-03 07:05 - Oz Mose

sorry, forgot to mention, I'm referring to 2.0.1 code.

#2 - 2012-06-03 12:31 - Toshi MARUYAMA

- Subject changed from fix edit view for repositories to enable to edit path for repositories

#3 - 2012-06-03 12:34 - Toshi MARUYAMA

Git uses SHA-1 hash for revisions.
But, Redmine does not store Subversion UUID.
And Mercurial revision number changes among repositories.
So, changing repository path is very danger.

#4 - 2012-06-03 12:48 - Oz Mose

well this is not impacting the scm content actually that's only the destination of the configuration edit form that is changed to [Jack Zheng](#). The @path could not be used for that.

And this patch don't make the repository path modifiable.

#5 - 2012-06-03 12:53 - Toshi MARUYAMA

What is a problem?
"repository_path" is Rails route syntax.

#6 - 2012-06-03 13:02 - Oz Mose

yes and it takes an argument which is the repository id, provided by [Jack Zheng](#), but not by @path. Just try to edit a repository and it will say that route don't exist because @path is just not set for the edit view by the controller.

#7 - 2012-06-03 13:07 - Toshi MARUYAMA

- Subject changed from enable to edit path for repositories to fix edit view for repositories

#8 - 2012-06-03 13:09 - Toshi MARUYAMA

I cannot reproduce route error.
Please describe more details.

#9 - 2012-06-03 13:19 - Oz Mose

I have a project with an existing repository, I go to "settings", then 'repositories' tab, I see my git repo on one line, I click the link 'edit' on the right, and it gives me an error:

```
ActionController::RoutingError (No route matches {:action=>"update", :controller=>"repositories", :id=>nil}):  
  app/views/repositories/edit.html.erb:3:in `_app_views_repositories_edit_html_erb__1031469684_104936220'
```

:id being null, I go to the controller, see that [Jack Zheng](#) and [Herve Harster](#) are set by a before_filter on the edit method, then check the view, and see @path as an argument to repository_path(), so I change it to [Jack Zheng](#), then it sets the id, and fixes the route.

#10 - 2012-06-03 13:42 - Toshi MARUYAMA

- File issue-11083.diff added

Could you try this patch?

#11 - 2012-06-03 13:44 - Toshi MARUYAMA

I cannot reproduce on "ruby 1.8.7 (2012-02-08 patchlevel 358) [i686-linux]" and "passenger (3.0.11)".

#12 - 2012-06-03 14:32 - Toshi MARUYAMA

- Status changed from New to Closed

I can reproduce on Rails 3.2.5, and fixed in [r9761](#).
