What's your DB adapter, etc. (see [SubmittingBugs](#) for details)?

#6 - 2012-06-05 17:04 -

my database manager version : mysql 5.1
my Ruby version :ruby 1.9.3
my Rails version : 2.3.14
my Redmine version :1.4.2

#7 - 2012-06-05 19:13 - Etienne Massip

my database manager version : mysql 5.1

Is that mysql or mysql2? you should use mysql2 adapter.

#8 - 2012-06-06 11:30 -

thank you to answer.
But,I have change db version to 6.0.I click the chinese link,error 500 still happan.
This is why?
Is it ruby 1.9.3's bug?

You don't need to update your database management system, the only prerequisite is to use the mysql2 db adapter and not the mysql one and that it is configured subsequently in your database.yml.

#10 - 2012-06-06 16:13 - 👤

I have change ruby version from 1.9.3 to 1.8.7,and the bug is soluted.
thank you to your's answer,Mr.Etienne Massip.Please close the issue.

#11 - 2012-06-06 16:14 - 👤

- Status changed from New to Resolved

- Subject changed from Error 500 when clicking on chinese wiki link to Error 500 when clicking on chinese wiki link on Japanese Windows Ruby 1.9

#13 - 2012-06-06 16:25 - Toshi MARUYAMA

- Status changed from Resolved to Closed
- Resolution changed from Cant reproduce to Wont fix

It seems you use Japanese Windows.
"Windows-31J" is CP932 on Japanese Windows.
Rails2 on Japanese Windows and Ruby 1.9 has some problems.
I recommend you to use Redmine 1.4 (Rails2) on Ruby 1.8.

#14 - 2012-06-07 11:51 - Toshi MARUYAMA

- Subject changed from Error 500 when clicking on chinese wiki link on Japanese Windows Ruby 1.9 to Error 500 when clicking on Chinese wiki link on Japanese Windows Ruby 1.9
