Target version:			
Resolution:			
Description			
<p>I'm somewhat new to redmine, I tried to figure out how to configure user privilege about "creating a project", but failed to find one on user configuration page.</p> <p>It was actually on the user-project privilege configuration page.</p> <p>If I'm correct, current process of assigning users the privilege about creating a project is:</p> <ol style="list-style-type: none">Create a privilege in roles and permissions page (if it doesn't exist yet, optional) <p>Check "Create project"</p> <ol style="list-style-type: none">Select a user and assign a project with the privilege from (a)End, now that user can create a project.			
<p>But I think it's more natural assigning a privilege like "create project" should go into the user configuration page.</p> <p>It's not related to some projects, isn't it?</p> <p>(maybe it's fixed already in the current version. Im using 1.2.1, because im so lazy --)</p>			

History

#1 - 2012-06-10 22:19 - Jean-Philippe Lang

- Tracker changed from Defect to Feature

- Subject changed from *Is it rational assigning "create a project" privilege be per project basis?* to *"Create project" privilege at user level*

#2 - 2012-06-10 22:21 - Jean-Philippe Lang

As a workaround, you can give the "Create project" permission to the non-member role. All registered users will be able to create projects.

#3 - 2012-06-10 22:36 - Kei Kim

Thanks. But it's not possible for our project. For us, some user accounts exist just to report issues. Anyway it's a nice workaround.
