

Redmine - Defect #11133

Wiki-page section edit link can point to incorrect section

2012-06-11 12:56 - Maarten Hoogveld

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:	2.0.3	Affected version:	2.0.2
Resolution:	Fixed		
Description			
<p>When headers in a wiki page are preceded by a line with one space (instead of an empty line), the section edit links edit the wrong section of the section of the page.</p> <p>This is present in versions 1.4.1 and 2.0.2 of Redmine.</p> <p>With the example content, four h1. sections are created.</p> <p>The links point to the correct url (e.g. link to edit chapter 3 point to ?section=3)</p> <p>The content shown in the edit page however, does not correctly respond to the section.</p> <p>Clicking the edit link for Chapter 2 will edit Chapter 2 and 3.</p> <p>Editing Chapter 3 will edit Chapter 4.</p> <p>Headers may have to be separated by empty lines, but if an accidental space is present on such a line, it is not at all clear to the user why section editing does not work correctly.</p> <p>To reproduce:</p> <ul style="list-style-type: none">- Create an wiki page with the content provided in the attachment (Note the added space above the line 'h1. Chapter 3')- Save page- Click on the several section-edit icons
