Description

I'd like to include a screenshot or a logo into the project overview.
I couldn't attach an image file to the overview page.

The !http://somewhere/something.png! inclusion of an image works well.

I found a workaround that works with markdown syntax in project descriptions, I suppose it also works with textile

    attachments/thumbnail/<image_id>

```
![](/attachments/thumbnail/1)
!/attachments/thumbnail/1!
```
