Target version:				
Resolution:	Fixed		**Affected version:**	2.0.1

Description

Hello,

I think they are an error in the installation page for 1.4.x and 2.x.x version of redmine.

The postgreSQL requirement is false, i've migrated since 1.4.3 to 2.0.1 (migrated ruby and rails too with all delegate gems) and the command rake returns:

```
*(Your version of PostgreSQL (80111) is too old, please upgrade!)*
        from /usr/local/lib/ruby/gems/1.9.1/gems/activerecord-3.2.3/lib/active_record/connection_a
dapters/postgresql_adapter.rb:334:in `initialize'
        from /usr/local/lib/ruby/gems/1.9.1/gems/activerecord-3.2.3/lib/active_record/connection_a
dapters/postgresql_adapter.rb:28:in `new'
        from /usr/local/lib/ruby/gems/1.9.1/gems/activerecord-3.2.3/lib/active_record/connection_a
dapters/postgresql_adapter.rb:28:in `postgresql_connection'
```

My PostgreSQL Server version is 8.1.11, please change this requirement:

_PostgreSQL 8 or higher

```
make sure your database datestyle is set to ISO (Postgresql default setting). You can set it using
: ALTER DATABASE "redmine_db" SET datestyle="ISO,MDY";
    some bugs in PostgreSQL 8.4.0 and 8.4.1 affect Redmine behavior (#4259, #4314), they are fixed
 in PostgreSQL 8.4.2
```
_

Nabil.
