Description

It would be nice to get something like this as log entry catched:
"Merged branch (user/#123-fix-the-damn-thing)"

Right now i can put "*" into "Referencing keywords" to get refs when i use issue-id in the commit log, but the issue id has to stand alone.

E.g. regexp:
"Merged branch \(.*\/$1-.*\)"
might be nice.

Sorry if syntax might be not 100% correct.
