

Redmine - Defect #11178

Spent time sorted by date-descending order lists same-date entries in physical order (not-reverse)

Description			
<p>We use the Bitnami stack at work and I've realized that date-sorting spent times always has a secondary sort of "physical order"-ascending (I don't know of a better way of expressing it).</p> <p>This way, when I enter two different spent times on the same date (usually under the same issue) and then get a report, the last entry appears second from top.</p> <p>Could you fix it so that when the date order is reversed, the physical order is reversed as well?</p>
