

Redmine - Defect #1119

Links to repository directories are broken in git

2008-04-27 07:34 - Leandro Lucarella

Status:	Closed	Start date:	2008-04-27
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	0.7	Affected version:	
Resolution:	Fixed		
Description			
<p>When making a link to a repository directory (using source\repo\dir syntax) instead of showing the directory tree, it shows a file content which has some git info, like:</p> <pre>tree HEAD:repo/dir file_1 file_2 ... file_N</pre> <p>Where file_i are the directory contents.</p>			

Associated revisions

Revision 1365 - 2008-04-27 12:12 - Jean-Philippe Lang

Fixed: Links to repository directories don't work (#1119).

History

#1 - 2008-04-27 12:13 - Jean-Philippe Lang

- Category changed from Wiki to SCM
- Status changed from New to Closed
- Target version set to 0.7
- Resolution set to Fixed

Actually, this problem was not specific to git.
It's fixed in [r1365](#). Linking to a directory will now display the browser.
