Resolution:	Wont fix		

Description

Dear all,

On the page associated to the view "View all issues", we found an unexpected event. Indeed, if you highlight, entirely or partially, the content of **only one** field (see the first screenshot named "step_1.png"), then the content disapeared (see the second screenshot named "Step_2.png").

It happens on each field of this kind of view and we can't access to an issue if the fields "#" and "Subject" were highlighted.

The content re-appears if we refresh the page and no information is lost.

This is not linked to our plateform because it can be reproduced on this website (ie <http://www.redmine.org>).

We are using IE8 and it does not happen when we use Firefox.

Please can you indicate us a way to solve this issue?

Best regards,

History

#1 - 2012-06-26 19:22 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix

It looks like a browser UI issue. Sorry, but I can't see a way to fix it.
