Redmine - Defect #11284

Email missing route after change home route

2012-06-28 11:46 - Sølve Monteiro

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**

Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	2.0.2

Description

I want to have the project list as the home page for my redmine site, so I changed the following in routes.rb from

```
  root :to => 'welcome#index', :as => 'home'
```

to

```
  root :to => 'projects#index', :as => 'home'
```

However, now email notification is not working. When I attempt to send a test-email I get the following error:

```
An error occurred while sending mail (No route matches {:controller=>"welcome"})
```

Any help would be greatly appreciated.

Please check if code below is working for you (it's working for me)

```
# Just add this below 'root :to=> ...' line
match '/', :to => 'welcome#index', :as => 'home'
```

#2 - 2012-07-23 13:08 - Sølve Monteiro

- Status changed from New to Resolved

Thank you very much, this worked!

#3 - 2013-01-13 23:46 - Jan Niggemann (redmine.org team member)

- Status changed from Resolved to Closed

- Resolution set to Fixed

If you are implementing this solution with a more recent version of Redmine (or Rails, specifically), it appears that you will need to replace the ":as" option with a "via" argument (per http://guides.rubyonrails.org/routing.html):

```
# Just add this below 'root :to=> ...' line
match '/', :to => 'welcome#index', via: :all
```
