Redmine - Patch #11295

Add class-attributes to custom fields on issue show page

2012-06-29 22:17 - Ingo Linde

Description

On the issues show page custom fields are currently rendered without any id or class (I have yet to investigate how this is dealt with on other pages).

I would like to propose to add a class-attribute with a value like "custom-field-id-#" to the related tags in similar fashion as is already done for the default Redmine fields for issues on that page.

This feature should allow/facilitate to distinguish between custom fields when accessing them via CSS and JavaScript (e.g. for plugins to achieve custom styling, reporting or evaluation).

The attached patch makes a suggestion on how this could be implemented.
The patch was generated against redmine trunk at r9903.

History

#1 - 2016-05-18 13:40 - Ingo Linde

- Status changed from New to Resolved

Has been added by now.

#2 - 2016-06-11 05:25 - Go MAEDA

- Status changed from Resolved to Closed

The same feature was implemented in r12400 (Redmine 2.5.0).
Thanks for pointing it out.
