

Redmine - Patch #11295

Add class-attributes to custom fields on issue show page

2012-06-29 22:17 - Ingo Linde

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:			
Description <p>On the issues show page custom fields are currently rendered without any id or class (I have yet to investigate how this is dealt with on other pages).</p> <p>I would like to propose to add a class-attribute with a value like "custom-field-id-#" to the related tags in similar fashion as is already done for the default Redmine fields for issues on that page.</p> <p>This feature should allow/facilitate to distinguish between custom fields when accessing them via CSS and JavaScript (e.g. for plugins to achieve custom styling, reporting or evaluation).</p> <p>The attached patch makes a suggestion on how this could be implemented.</p> <p>The patch was generated against redmine trunk at r9903.</p>			

History

#1 - 2016-05-18 13:40 - Ingo Linde

- Status changed from New to Resolved

Has been added by now.

#2 - 2016-06-11 05:25 - Go MAEDA

- Status changed from Resolved to Closed

The same feature was implemented in [r12400](#) (Redmine 2.5.0).
Thanks for pointing it out.
