| Resolution: | Invalid | | |
| Description | | | |
| http://www.redmine.org/projects/redmine/wiki/HowToInstallRedmineOnUbuntuServer | | | |
| I believe that the package libmysqlclient-dev should be installed instead of libmysqlclient15-dev. | | | |
| !!!further there is no checking of which gem --version is installed before installing the rails, rake mysql gems | | | |
| and finally the how to page: http://www.redmine.org/projects/redmine/wiki/HowTos | | | |
| links with the claim of installing redmine 1.2 | | | |
| These are minor additions to an otherwise excelent HowTo. May I add these myself? | | | |
| Thank you, V.Schmidt | | | |

History

#1 - 2012-07-06 21:31 - Jean-Philippe Lang

- Category changed from Wiki to Documentation
- Status changed from New to Closed
- Resolution set to Invalid

May I add these myself?

Please feel free to fix/improve the wiki. Thanks.
