[501 command argument is not acceptable ]			
Redmine installation info:bitnami-redmine-2.0.3-1-windows-installer.exe			

History

#1 - 2012-07-12 09:47 - Etienne Massip

Clearly there is not enough information, please check your production.log and give details according to [SubmittingBugs](#).

It's very likely that there is a problem with your email configuration, though.

#2 - 2012-07-13 04:57 - Vincent Lee

- Status changed from New to Resolved

I resolved the notification error by editing apps\redmine\htdocs\config\configuration.yml like below:

```
# default configuration options for all environments
default:
  # Outgoing emails configuration (see examples above)
  email_delivery:
    delivery_method: :smtp
    smtp_settings:
      # arguments: "-i"
      address: "10.192.1.1"
      port: 25
      domain: "xxx.com.cn"
      authentication: :login
      user_name: "user1"
      password: "123456"
      enable_starttls_auto: true
```

Another problem is :  
i can't find redmine logs,the ~~apps\redmine\htdocs\log\production.log~~ does not help very much!
