<b>Resolution:</b>	Wont fix		

**Description**

reposman.rb doesn't work with Redmine 2.0.3 and Ruby 1.8.7 because of an incompatibility between the "builder" gem (v3.0.0) and Ruby 1.8.7. It can be reproduced by going to [http://redmine\\_hostname/sys/projects.xml?key=my\\_key](http://redmine_hostname/sys/projects.xml?key=my_key).

The problem is explained in the following pull request: <https://github.com/jimweirich/builder/pull/12>

We could fix our problem here by using the gem from the pull request submitter, instead of the official gem. Here's the line we put in our Gemfile.local:

```
gem 'builder', :git => 'https://github.com/elisehuard/builder.git', :ref => '53582a84556102b4d81f144f8c6a28cf9157516d'
```

(of course, we removed the gem "builder" line from Redmine's Gemfile) Usual informations:

- Redmine 2.0.3 from SVN [r9959](#) (branches/2.0-stable)
- Ruby 1.8.7
- Rails 3.2.6
- Debian Squeeze

#### History

##### #1 - 2012-07-13 17:19 - Jean-Philippe Lang

Tests are OK on the [CI server](#) with ruby 1.8.7 and builder 3.0.0.

##### #2 - 2012-07-15 13:48 - Toshi MARUYAMA

- Category set to SCM extra

##### #3 - 2015-04-05 09:44 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

The pull request to builder was merged. In addition, Redmine 3.0 dropped Ruby 1.8 support and Ruby 1.8.7 is no longer officially supported.

We can close this issue.
