Hi!

I am evaluating various software for our project management and came across redmine. It is pretty nice and my hearty congratulations for the developers.

One of the things I would like to see in redmine, is to customize the columns that are exported to the csv/pdf file during the issue exports. Please let me know if there is any activity in this regard.

Regards,
Mohan.

- Status changed from New to Closed

PDF export now uses the same columns as the issue list.
See #1190.
