<b>Description</b> By default, Redmine's diff reports any whitespace differences. To turn this off please edit:  /home/redmine/lib/redmine/scm/adapters/git_adapter.rb  locate the lines:  <pre>if identifier_to cmd_args &lt;&lt; "diff" &lt;&lt; "--no-color" &lt;&lt; identifier_to &lt;&lt; identifier_from else cmd_args &lt;&lt; "show" &lt;&lt; "--no-color" &lt;&lt; identifier_from end</pre> and change them to:  <pre>if identifier_to cmd_args &lt;&lt; "diff" &lt;&lt; "--no-color" &lt;&lt; "-w" &lt;&lt; identifier_to &lt;&lt; identifier_from else cmd_args &lt;&lt; "show" &lt;&lt; "--no-color" &lt;&lt; "-w" &lt;&lt; identifier_from end</pre>

In my opinion it should be a option under the settings point repositories.

In a previous version I hacked in a setting at the top of the diff page that turned on and off whitespace ignoring, like the inline versus side-by-side

setting. It worked well in my case, but isn't worthy of a patch because it only worked for Subversion. Doing it properly would require passing some options down through the scm models.
