

Redmine - Feature #11414

Ignore whitespace when using GIT

2012-07-16 19:46 - Jaroslaw Bogusz

Status: New	Start date:
Priority: Low	Due date:
Assignee:	% Done: 0%
Category: SCM	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description By default, Redmine's diff reports any whitespace differences. To turn this off please edit: /home/redmine/lib/redmine/scm/adapters/git_adapter.rb locate the lines: <pre>if identifier_to cmd_args << "diff" << "--no-color" << identifier_to << identifier_from else cmd_args << "show" << "--no-color" << identifier_from end</pre> and change them to: <pre>if identifier_to cmd_args << "diff" << "--no-color" << "-w" << identifier_to << identifier_from else cmd_args << "show" << "--no-color" << "-w" << identifier_from end</pre>

In my opinion it should be a option under the settings point repositories.

#3 - 2012-10-15 13:30 - Toshi MARUYAMA

- Status changed from Resolved to New

- Resolution deleted (Fixed)

#4 - 2013-05-13 10:38 - Prof. Dr. YoMan

#5 - 2014-05-21 12:12 - Mathias Fischer

+1 would be very helpful for code reviews

#6 - 2014-07-01 10:18 - Anonymous

+1

In a previous version I hacked in a setting at the top of the diff page that turned on and off whitespace ignoring, like the inline versus side-by-side

setting. It worked well in my case, but isn't worthy of a patch because it only worked for Subversion. Doing it properly would require passing some options down through the scm models.
