Redmine - Feature #11469
JSONP support
2012-07-20 17:27 - Markus M

Status: Closed
Priority: Normal
Assignee: Jean-Philippe Lang
Category: REST API
Target version: 2.1.0
Resolution: Fixed

Description

Please enable JSONP

This is necessary when a JS-Client wants to call the Redmine API of another Subdomain, Server, Protocol, Port... (Same Origin Policy)

It's not that hard to accomplish. You just need to set a request filter that wraps the response in a given JS function. See #10761 for an example of the expected output.

Revision 10088 - 2012-07-27 21:56 - Jean-Philippe Lang

Adds JSONP support to the API (#11469).

History

#1 - 2012-07-21 18:09 - Etienne Massip
- Category set to REST API

#2 - 2012-07-22 22:53 - Jean-Philippe Lang
- Assignee set to Jean-Philippe Lang
- Target version set to 2.1.0

#3 - 2012-07-27 21:58 - Jean-Philippe Lang
- Subject changed from Enable JSONP to JSONP support
- Status changed from New to Closed
- Resolution set to Fixed

Support for JSONP added in r10088. You can use the callback or jsonp parameter to specify the JSONP callback.

Exemple:

```
GET /issues.json?callback=foo
=> foo(["issues":...])
```
If you come into this page by searching, since #12992 JSONP support is disabled by default.
