<b>Category:</b>	Email receiving	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	1.4.4
<b>Resolution:</b>			
<b>Description</b> we have a redmine 1.4.4 I've created an email so we can auto create support issues. I need the new issues to be auto assigned to one of our developers and therefor I've created a category and added the developer as assignee. I'm using redmine:email:receive_pop3 task to process the emails. issues are create without problem with the designated category (using the category=<cat> flag) and the user is being assigned to the ticket but notification are not sent to the assignee upon issue creation.  It does work and the system sends notifications when I create the issue manually.
