Sometimes you want to set up a project which accepts email from new users (as in `--unknown-user=create`,) but you don't want Redmine to reply with account information for the newly created users (to avoid mailing back to spammers, etc.)

This patch adds a Redmine's mail handler script option just for that.
Feature added in r11525, thanks.

#4 - 2013-03-10 13:36 - Jean-Philippe Lang
- Status changed from Resolved to Closed

Merged.

#5 - 2013-03-18 13:16 - Terence Mill

Howto expanded: [[RedmineReceivingEmails#Enabling-unknown-users-to-create-issues-by-email]]

#6 - 2013-04-07 22:05 - Brandon Bertelsen

This feature doesn’t seem to work in cron. Example:

```ruby
*/30 * * * * cd /usr/share/redmine && rake redmine:email:receive_imap RAILS_ENV="production" port=993 ssl=true host=imap.gmail.com username={} password={} project=Support status=New priority=High tracker=Support unknown_user=create no_permission_check=1 no_account_notice=1
```

The above still sends account notification emails to new email addresses.

```

The above still sends account notification emails to new email addresses.
```

Hm, indeed. The fix is trivial (attached.)

Now that I think about it, why don’t we extract the options thing from the 3 rake tasks, like so:

```ruby
task :setup_options => :environment do
  @options = { :issue => {} }
  %w(project status tracker category priority).each { |a| @options[:issue][a.to_sym] = ENV[a] if ENV[a] }
  %w(allow_override unknown_user no_permission_check no_account_notice).each { |a| @options[a.to_sym] = ENV[a] if ENV[a] }
end
```

2020-03-15
task :read => :setup_options do
  MailHandler.receive(STDIN.read, @options)
end

Ugh, sorry: not enough coffee. Attaching the correct patch.

#9 - 2013-04-08 16:03 - Etienne Massip
Could you please post a new issue since this one has been closed for version:2.3.0?

#10 - 2014-12-02 01:34 - Go MAEDA
- Related to Feature #8673: Disabling user creation emails. added

#11 - 2018-02-03 03:58 - Mischa The Evil
- Duplicated by Feature #7919: Adding option to disable activation mail for users created via email unknown_user=create added
