## Description

I recently needed a read-only access to the roles details via the REST API and implemented that - based on code from the original submission from #9725.

The patch adds a /roles/[id]..format route and a simple list of granted permissions for the requested role.

Also find attached a contribution to complete the existing doc at <a href="http://www.redmine.org/projects/redmine/wiki/Rest\_Roles">http://www.redmine.org/projects/redmine/wiki/Rest\_Roles</a>.

#### Revision 10620 - 2012-10-12 19:22 - Jean-Philippe Lang

Expose roles details via REST API (#11502).

#### History

## #1 - 2012-07-24 19:57 - Jean-Philippe Lang

I'm not sure that everyone want the details about all their roles to be publicly visible.

## #2 - 2012-07-25 00:08 - Terence Mill

Then we would need a right to have access to that roles information (at the moment onyl admin has this via web gui or using additional plugin like redmine\_information (<a href="http://www.redmine.org/plugins/rp\_information">http://www.redmine.org/plugins/rp\_information</a>).

#### #3 - 2012-07-25 12:31 - Vincent Caron

Since I'm a Rails newbie I'm not sure I handled authentication correctly.

From my tests with my patch (using cookie-based auth with my browser):

- /roles.xml is available without authentication (original behaviour)
- /roles/:id.xml requires auth, returns result for an admin, 403 Forbidden for other regular users

Is that fine?

I might second Terence suggestion, in my case I'd be happy with a kind of read-only admin account (see everything, but don't touch anything) and finer grain permissions; but since the consumer is my own code in another controlled application, I know I only issue GETs and I'm pretty happy to access Redmine REST services at admin level.

Jean-Philippe: would you accept the attached patch while it has no POST /roles/:id.:format implementation? I deliberately skipped that part.

#### #4 - 2012-09-01 14:22 - Vincent Caron

- Assignee set to Jean-Philippe Lang

#### #5 - 2012-10-12 19:25 - Jean-Philippe Lang

- Status changed from New to Closed
- Target version set to 2.2.0
- Resolution set to Fixed

Committed in r10620 with tests. The API is available to everyone, just like /roles.xml.
