

Redmine - Defect #11506

Versions that are not shared should not be assignable when selecting another project

2012-07-25 10:49 - Jan from Planio [www.plan.io](http://www.plan.io)

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	2.1.0	Affected version:	
Resolution:	Fixed		
<b>Description</b>			
Steps to reproduce:			
<ol style="list-style-type: none"><li>1. Create a project with a version that is not shared</li><li>2. Create an issue in that project with that target version</li><li>3. Update the issue, select a different project</li><li>4. Save</li></ol>			
Not only is the Version still available in the dropdown, it is also still present after the issue has been saved resulting in an incoherent state as there's no other way the version could have been set on that issue.
