<b>Description</b> i've many customers and i like to group the projects by Customer. It would be really helpful to group the projects. So i can imagine that other people would like to group their projects by categories e.g. PHP-Projects, Ruby&Rails-Projects, Java, ... or even have Projects grouped by Customer oder Categories like „web-sites“, „online-shops“, ...	

### History

#### #1 - 2008-05-01 18:06 - Carl Nygard

I have the same need, and creating a project for the customer and sub-projects for the actual individual projects works fine. You can even get a customer-wide view by looking at information at the customer level. Are you sure this won't satisfy your requirements?

#### #2 - 2008-05-01 18:35 - Marco Tralles

this is just a way i work around at this time - but my problem is one step more difficult:

1. customer
  1. project
    1. backend
    2. frontend
    3. desktop-tools
  2. project
    1. backend
    2. frontend
  3. project - single-website
2. customer
  1. project
    1. backend
    2. frontend
  2. project - single-website
  3. project - Java-Desktop-Tool

actually i „group“ the first level by naming the projects e.g.:

- customer 1 | onlineShop
  - backend
  - frontend
  - frontend-b2b-portal
- customer 1 | portfolio
  - single-website
- customer 2 | picture agency
  - backend
  - frontend
  - java-upload-manager

I think some of this can be done by using custom fields that will become more useful with the addition of filtering capability at the projects page.

#### #4 - 2008-06-13 23:50 - Yanoksy Durañona Yero

- Assignee set to Jean-Philippe Lang

#### #5 - 2008-11-11 10:37 - Jean-Philippe Lang

- Target version deleted (0.8)

**#6 - 2016-09-16 09:44 - Benjamin Schunn**

I think something like virtual groups could be helpful for every user not only admins. Every user could customize his project structure and improve his quantity

**#7 - 2016-09-18 17:42 - Toshi MARUYAMA**

- *Status changed from New to Closed*
- *Assignee deleted (Jean-Philippe Lang)*

[#594](#) implemented unlimited nesting sub projects.
