**Description**

Hi,

we have the same error also (see [#11318](#)), if we try to access a "external" svn with username and password. Local svns at the redmine server works ... So please have anyone here a solution or exits a bugfixing?

Redmine version 2.0.1.stable

Sorry but we don't provide support here. Unless you're able to figure out what is going wrong with your svn access, I can't fix anything. Please, have a look at the similar issues: http://www.redmine.org/search?issues=1&q=%22No+close+tag+for%22

And it was a configuration issue.
