

## Redmine - Feature #11578

### Option to pass whole arguments to a macro without splitting them

2012-08-03 14:31 - Miko Kinski

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>	Plugin API	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2.1.0		
<b>Resolution:</b>	Fixed		
<b>Description</b>			
Why not passing the whole content of the macro to the <code>exec_macro</code> and let the macro developer decide whether or not he has any arguments or not which are separated by comma or something else. This Issue is also related to ongoing discussion <a href="#">#3061</a> of parsing complete macro text without exclusion.

Adds an option to macro definition to disable arguments parsing (#11578).

#### History

##### #1 - 2012-08-08 18:32 - Jean-Philippe Lang

- Subject changed from *passing whole args in parse\_macros without splitting them* to *Option to pass whole arguments to a macro without splitting them*
- Category set to *Plugin API*
- Status changed from *New* to *Closed*
- Assignee set to *Jean-Philippe Lang*
- Target version set to *2.1.0*
- Resolution set to *Fixed*

Obviously, I can't change the current behaviour for compatibility reasons but an option `:parse_args => false` is added in [r10174](#) to disable arguments parsing when registering a macro. Example:

```
macro :my_macro, :parse_args => false do |obj, args|
  # args is the whole string of arguments used to invoke the macro
end
```
